-Covenant Health System, in collaboration with Texas Tech Physicians of Lubbock, Department of Psychiatry, has partnered with Texas Health and Human Services to offer high quality care to individuals who are unfunded or underfunded. The IOP program offers a comprehensive, 16-week program that follows a decreasing intensity model. This means that our program is most intensive in the first 4 weeks and depending on the progress of each individual, programming is stepped done in frequency. Our program is open to adults, aged 18 and above, whose primary diagnosis is a

substance use disorder. IOP groups are offered in the evening to allow participants to take care of their work responsibilities during the day. -The program consists of group and individual therapy, family education, medication management and drug testing. All referrals are screened for appropriateness and given a detailed assessment before services begin. Clients are given an overview of the program and explained the rules of participation so that they are ready to engage when they arrive to their first meeting. Program participants will also be encouraged to utilize recovery support in the community, as a complement to their IOP programming.
